The Forest Service guy at the congressional meeting yesterday mentioned it...wasn't clear who was doing the cleanup/testing.

I am not aware of this, but Judy was, and may know.

Hi. Have we heard that there has been a soil removal at the Fred Meyer daycare? Someone from the Forest Service at the congressional meeting with Dennis said this...

Fyi, we are back in the game. Richard captures the situation fairly well.

Hi Folks. After discussing the ODEQ request for assistance (see below emails) with OSC Dave Rees and EPA management, we are going to loan our XRF and standards, currently located in the Portland Office, to ODEQ in order to assist them with screening and sampling efforts related to the Portland metals emissions sites.

Eric and START - Please check out the XRF to Ray Hoy, State On-Scene Coordinator, with ODEQ as of today's date, 2/18/16. The estimated end date is Feb. 26, 2016.

Ryan Whitchurch will transport the XRF and the standards to ODEQ's NW office in Portland this morning, and will give them a basic lesson on its operation. I will meet Ryan there for the handoff and equipment guidance lesson. We will also be bringing one of our ER contractors, Jake Moersen (who is our expert in the XRF operation) down from Seattle to provide guidance and technical assistance to the ODEQ team for tomorrow's sampling event. Jake will only be here a short time, but after he demobilizes the site, will be available to the ODEQ team via cell for any other guidance or assistance as needed.

Equipment info: XRF
EPA Property Label, #C13265
SN #541426, Model #DP01-4000
Manufacturer – Olympus

Standards: SiO2 Blank
NIST 2711
NIST 2710A
NIST 2709A
NIST SRM 2573 Red
NIST SRM 2570 White

Please let me know if you have any questions,

Thanks,

Richard Franklin

Richard, thanks for the note. After talking with the crew, we have found that our XRF does not appear to be very reliable. The crew feels this is due in part to its age and quirkiness. According to Ray Hoy, who's on the team, EPA's XRF is much newer and likely more effective than ours. So- would it be possible to still borrow it? I can dispatch Ray to get it from you, along with the SOP. I am copying Ray on this.

Feel free to check in with Ray (503-229-6712) directly, as I am going in about 4 directions at once right now...

Thanks again!

Hey Keith,

Thanks for visiting with me this morning about our offer of assistance to ODEQ on this site, via our loaning of XRF equipment and other resources. I enjoyed talking with you, and as you know, we are always ready to help you guys. I'm just confirming our discussion of today, that for now at least, ODEQ is not requesting our assistance via the loaning of XRF equipment and standards to help with the ongoing ODEQ soil screening and sampling effort in Portland. We are standing down our internal efforts at making sure an XRF and technical contractor assistance is available, but are still prepared to help with equipment and other resources in the future should you desire assistance.

Thanks again, Keith. Please do not hesitate to call, anytime.

Regards,

Richard Franklin
